

Quick start

1 Switching on the camera

- Connect the camera to the power supply using a USB type cable / 12V DC power supply*.
- Wait a few seconds until the indicator starts flashing green / wait until the unit has completed its self-test*.

2 BCS Line configuration

- Download the BCS Line app from the App Store or Google Play and install it on your phone.
- Launch the BCS Line app and register an account.

Google Play

AppStore

3 Adding a camera to the BCS Line

- Log in to the BCS Line app.
- Click ⊕ in the upper right corner and scan the QR code located on the bottom of the camera.
- Follow the instructions to configure the camera.

*Connection method depending on camera model.
