

Connect & Protect

Network defense for Small Business WiFi

Powerful Threat Protection

Connect & Protect (CNP) has been specifically designed to give small businesses a hassle-free and cost-effective approach to setting up powerful network protection for connected devices.

Setup your WiFi up in minutes

Set up and manage in minutes using just a phone via our Nebula APP or Access Nebula Control Centre (NCC) from a browser anywhere with an internet connection.

Privacy made simple

CNP keeps no information on Internet activity preserving the privacy of anyone connected. Sensitive business information and online activities are not monitored by network providers when you use a WiFi connection.

Application control

CNP+ available on the NWA110AX allows application visibility and bandwidth management to give you the control to prioritize core applications such as mobile POS, live video streaming, and voice/video calls on devices connected to the Access Point.

WiFi with built-in Security & easy configuration.

	NWA1123ACv3 1 Year CNP Included	NWA110AX 1 Year CNP+ Included
